

ESTIMATING INTEGRATION

ProEst + Buildertrend

Connect estimating and project management functions with one-click integration

From bid requests and scheduling to change orders and customer management, construction projects can get complicated, fast. That's where ProEst + Buildertrend integration comes in. Used together, these powerful software solutions consolidate and centralize estimates, takeoffs, financial reports and other project documents, simplifying every estimating and project management task. And because both ProEst and Buildertrend are web-based, your teams have access to the information they need anywhere, anytime.

Why ProEst + Buildertrend integration matters

Streamlining processes—and saving money doing it—is what ProEst + Buildertrend integration is all about. Project data is entered just once in ProEst, then moves automatically to Buildertrend once the job is awarded. There's no need to re-enter budget information, so you can be sure the data is accurate and complete, and calculations are made automatically, eliminating the potential for human error. Even better, your project information resides in one easy-to-access location, so jobs stay organized and timelines stay on track.

ESTIMATING INTEGRATION

ProEst + Buildertrend

Connect estimating and project management functions with one-click integration

Nothing can derail a construction job faster than project data that's inaccurate or unavailable to the people who need it. ProEst and Buildertrend work together to ensure that the information you use every day is consistent, complete and easy to access, whether you're in the office or on the job site. With ProEst + Buildertrend integration, you can cut down on repetitive data re-entry tasks, too, so your costs go down and your productivity goes up.

Automatic Data Transfer

ProEst + Buildertrend integration automatically moves budgets into project management.

Seamless Data Flow

ProEst + Buildertrend integration improves field and office communication time by 50%.

24/7 Online Access

ProEst + Buildertrend integration means you can update and share data anytime, anywhere.

Reduced Rework

ProEst + Buildertrend integration cuts down on costly project delays, errors and rework.

Centralized Data Hub

ProEst + Buildertrend integration consolidates and centralizes project information.

Efficient Workflows

ProEst + Buildertrend integration eliminates data silos for more efficient workflows.

Get to know ProEst construction estimating

ProEst provides advanced construction estimating capabilities for leading companies and public sector clients in the United States, Canada and Australia. Our cloud-based platform combines cost estimating, digital takeoffs and bid day analysis in a single powerful solution—a proven way to reduce costs, ensure accuracy and streamline pre-construction workflow.
