

# ProEst + Foundation

See your project numbers clearly from initial estimate to final closeout.

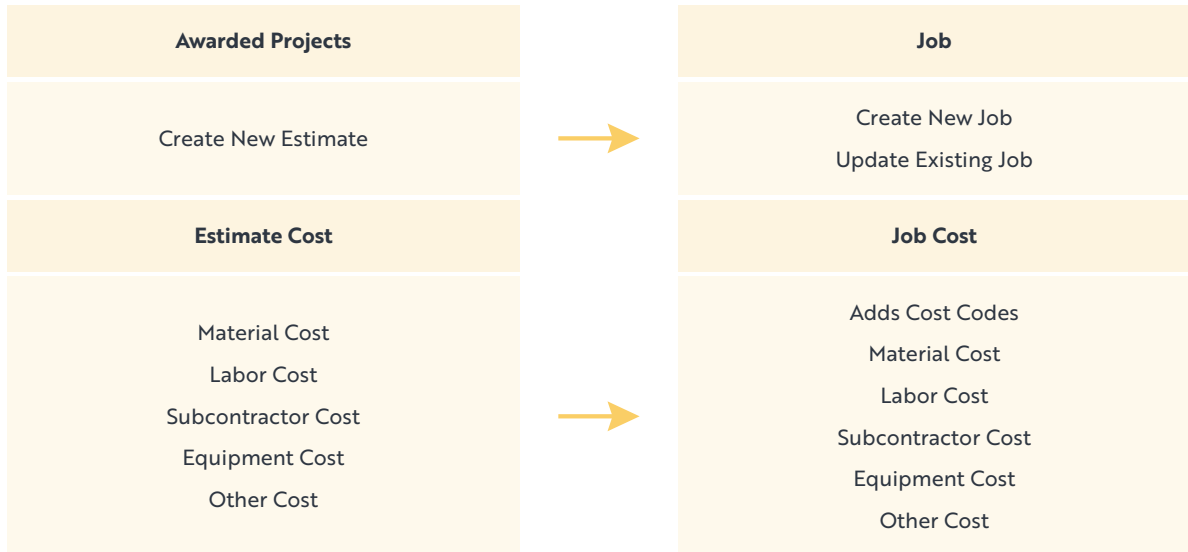

Having a clear view of financial details—budgets, costs, overhead, cash flow, payroll and more—is the key to running a profitable construction job, but with disconnected systems and data silos, it can be a challenge. That’s why ProEst + Foundation integration is so important—construction-specific applications that work together to ensure new levels of data accuracy and financial control. Productivity gets a boost, too, because information can be accessed and shared in real time, the key to accelerated workflows.

Integration Map

**ProEst**

**FOUNDATION**

### Why ProEst + Foundation integration matters

With ProEst + Foundations integration, budgets from ProEst flow into Foundation automatically, eliminating the need for time-consuming export and manual data entry. You save time. You save money. And data accuracy is virtually guaranteed. Thanks to ProEst + Foundation integration, your company will have greater visibility into potential cost overruns and budgeting issues, too, so you can be sure that every construction job is a profitable one.

## ESTIMATING INTEGRATION

# ProEst + Foundation

See your project numbers clearly from initial estimate to final closeout.

When your business systems work together, every construction project runs more smoothly, without the delays and process bottlenecks that can interfere with budgets and timelines. ProEst + Foundation integration means you only enter data once, eliminating re-entry errors, so you can trust that your numbers are accurate, complete and up-to-date.

### Automatic Data Transfer

ProEst + Foundation integration eliminates the need to manually re-enter estimate data.

### 24/7 Online Access

ProEst + Foundation integration means your teams can access information anytime from any location.

### Quick Cost Comparisons

ProEst + Foundation integration lets you easily compare budgeted costs with actual costs.

### User-Friendly Design

ProEst + Foundation integration offers a simple, intuitive interface with easy-to-read graphics.

### Error-Free Project Data

ProEst + Foundation integration delivers error-free data in every phase of the project lifecycle.

### Training and Support

ProEst + Foundation integration keeps productivity levels high with expert training and support.

### Get to know ProEst construction estimating

ProEst provides advanced construction estimating capabilities for leading companies and public sector clients in the United States, Canada and Australia. Our cloud-based platform combines cost estimating, digital takeoffs and bid day analysis in a single powerful solution—a proven way to reduce costs, ensure accuracy and streamline pre-construction workflow.
