ProEst + Microsoft Power BI

## Use project data to your advantage with powerful real-time analytics

Create estimate and pre-construction data in ProEst, and once jobs are awarded, simply transfer the information to the Microsoft Power BI analytics platform. Easy one-click integration gives your teams a new ability to assess business performance, find and share insights, and make confident, metrics-driven decisions.

ProEst®

Power BI

Integration Map

Sends Estimate Tables	Creates Datasets
Estimate	Item Details Markups Totals
Estimate Center	Estimate Details Totals Dates
Database Items	Database Details Cost Details
Database Assemblies	Assembly Details Formulas
Relationships	Company Information Contacts
User Data	Users User Roles Offices

Why it matters

Your data has a lot to tell you. But without an easy way to access, view, analyze and share that information with everyone in your company, it has limited value. That's why using ProEst + Microsoft Power BI is so vital to your business. Together, they offer a clear, up-to-the-minute view of how your projects are performing—and support the kind of collaborative decision-making you need to succeed.

ProEst®
